## Empowering success: the value of a MIPS Partnership

Through strategic partnership, we help clients navigate MIPS complexities and capture upward payment adjustments while steering clear of penalties.

Reporting Year	Upward adjustments received	Penalties avoided
2020	\$1,468,092	\$14,559,515
2021	\$2,170,487	\$16,883,870
2022	\$11,063,082	\$19,259,838
2023	\$3,829,189	\$22,057,869
	<b>\$18,530,850</b>	<b>\$72,761,092</b>

# The value of our MIPS Consulting Services

## We help take the MIPS burden off your staff

- Ongoing partnership to maximize your providers MIPS scores and upward payment adjustments
- Ongoing communication to you via email, phone calls, and educational webinars
- “Reputational” aspect of MIPS
- Regulatory reporting guidance tailored to your practice – we interpret MIPS rules and keep you abreast of the regulatory changes
- Review CMS cost feedback reports when they become available
- Regularly monitor your measures and provide guidance throughout the year
- Provide templates for security risk analysis documentation and [SAFER Guide](#)

# Key differentiators

Expert regulatory reporting guidance  
– not just a registry solution

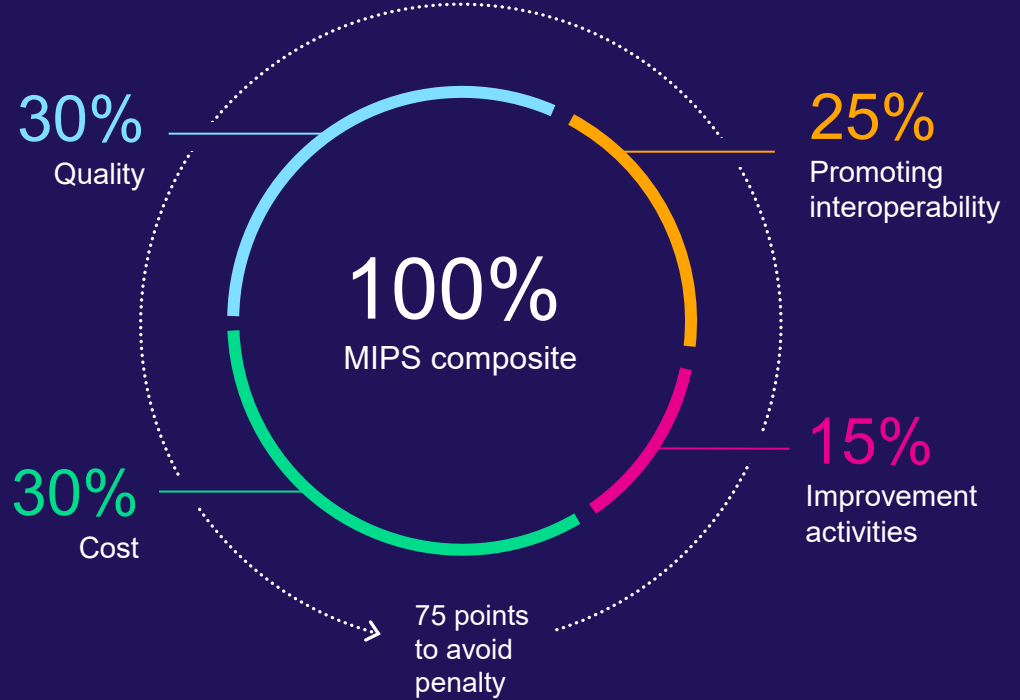

- Two MIPS senior consultants are assigned to each practice
- Deep dive into each measure and workflow suggestions by direct EMR access
- True subject matter experts that have experience with multiple EMR's and Specialties
- MIPS senior consultants work directly with the support staff of EMR if needed

- Optional audit service available - audit request by CMS is managed by our MIPS team of experts
- We maintain the 'Book of Evidence' for each 'Eligible Clinician'
- No creation of service tickets needed - real people offering real-time solutions

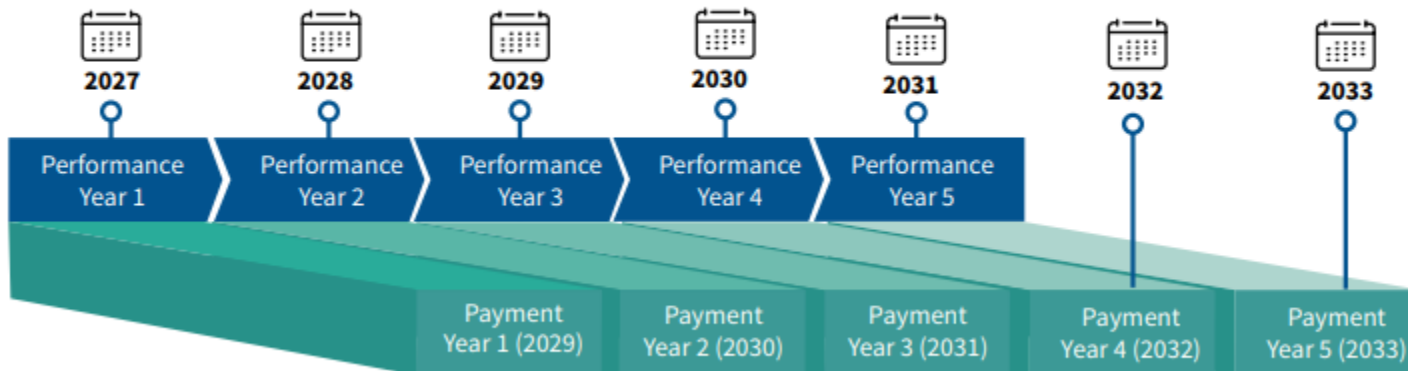

# 2026 MIPS composite score breakdown

# Ambulatory Specialty Model

- Begins January 1, 2027
- Mandatory Participation if selected (by core-based statistical area (CBSA) or metropolitan divisions)
- Adjustments will range from -9% to +9%
- Participation is for 5 years
- Scores are benchmarked within specialty groups in the model with same measures

## Model Timeline

# Additional information
